IVTScrip™ mRNA-Human ANXA8, (Cap 0, Pseudo-UTP, 30 nt-poly(A))

Cat. No.: GTTS-WK16466MR

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Product overview

This product GTTS-WK16466MR is a type of mRNA having 30 nt poly(A) tail and modified with Cap 0 & Pseudo-UTP. It ecodes the ANXA8 protein. This product can be used in Basal cell-related researches.

Specifications

Modified bases	Pseudo-UTP
5' Cap	Cap 0
Species	Human
RefSeq	NM_001040084.3
Applications	Gene therapy research
Format	Powder
Quantity	100 µg
Purification	Chromatography

Purification	Chromatography

GENE INFORMATION

Alternative Names	ANX8; CH17-360D5.2
Description	This gene encodes a member of the annexin family of evolutionarily conserved Ca2+ and phospho lipid binding proteins. The encoded protein may function as an an anticoagulant that indirectly inhi bits the thromboplastin-specific complex. Overexpression of this gene has been associated with ac ute myelocytic leukemia. A highly similar duplicated copy of this gene is found in close proximity on the long arm of chromosome 10. [provided by RefSeq, Jul 2008]
