
IVTScrip™ mRNA-Human TCF3, (Cap 0, N1-Methylpseudo-UTP, 120 nt-poly(A))

Cat. No.: GTTS-WK0466MR

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Product overview

This product GTTS-WK0466MR is a type of mRNA having 120 nt poly(A) tail and modified with Cap 0 & N1-Methylpseudo-UTP. It e codes the TCF3 protein. This product can be used in -related researches.

Specifications

Modified bases	N1-Methylpseudo-UTP
5' Cap	Cap 0
Species	Human
RefSeq	NM_001136139
Applications	Gene therapy research
Format	Powder
Quantity	100 µg
Purification	oligo-dT affinity purification

GENE INFORMATION

Alternative Names	VDIR; E2A; ITF1; E47
Description	This gene is a protein coding gene. Exhibits several functions, including DNA-binding transcription factor activity, RNA polymerase II-specific; DNA-binding transcription factor binding activity; and pr otein dimerization activity. Contributes to transcription regulatory region sequence-specific DNA bin ding activity. Involved in several processes, including immune system development; positive regula tion of B cell proliferation; and regulation of transcription, DNA-templated. Localizes to RNA polym erase II transcription regulator complex; cytoplasm; and nuclear lumen. Implicated in agammaglob ulinemia and colorectal cancer. Biomarker of colorectal cancer and prostate cancer.
