

IVTScrip™ mRNA-Human AKT2, (Cap 0, 5-Methyl-CTP & Pseudo-UTP, 30 nt-poly(A))

Cat. No.: GTTS-WK17781MR

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Product overview

This product GTTS-WK17781MR is a type of mRNA having 30 nt poly(A) tail and modified with Cap 0 & 5-Methyl-CTP & Pseudo-UTP. It ecodes the AKT2 protein. This product can be used in Idiopathic pulmonary fibrosis cell-related researches.

Specifications

Modified bases	5-Methyl-CTP & Pseudo-UTP
5' Cap	Cap 0
Species	Human
RefSeq	NM_001243027.3
Applications	Gene therapy research
Format	Powder
Quantity	100 µg
Purification	Chromatography

GENE INFORMATION

Alternative Names	PKBB; PRKBB; HIHGHH; PKBBETA; RAC-BETA
Description	This gene is a putative oncogene encoding a protein belonging to a subfamily of serine/threonine k inases containing SH2-like (Src homology 2-like) domains, which is involved in signaling pathway s. The gene serves as an oncogene in the tumorigenesis of cancer cells For example, its overexpr ession contributes to the malignant phenotype of a subset of human ductal pancreatic cancers. Th e encoded protein is a general protein kinase capable of phophorylating several known proteins, a nd has also been implicated in insulin signaling. [provided by RefSeq, Nov 2019]
