GENE INFORMATION

Alternative Names	CIA; CGI-98; HSPC146
Description	This gene encodes a member of the H3/H4 family of histone chaperone proteins and is similar to t he anti-silencing function-1 gene in yeast. The protein is a key component of a histone donor comp lex that functions in nucleosome assembly. It interacts with histones H3 and H4, and functions tog ether with a chromatin assembly factor during DNA replication and repair. [provided by RefSeq, Jul 2008]
