GENE INFORMATION

Alternative Names	ARC20; ARPC4; p20-ARC
Description	This locus represents naturally occurring read-through transcription between the neighboring ARP C4 (actin related protein 2/3 complex, subunit 4) and TTLL3 (tubulin tyrosine ligase-like family, me mber 3) genes. The read-through transcript encodes a fusion protein that shares sequence identity with each individual gene product. [provided by RefSeq, Nov 2010]
